## Summary

Aspiring and enthusiastic junior java developer looking forward to meeting with new amazing people and learning new things daily.

## Experience

### Tech Internship

Sofia, Bulgaria

04/2024 - Present

Voluntarily building a project for a client given to use by SoftUni while being supervised by a Team Leader also provided by them. The project is based on a web application responsible for transcribing files with speaker labeling, diarization and dual channel. For the back-end we're using Java with Spring Framework, more specifically Boot, Security and Web. For the database we're using PostgreSQL and have also implemented AssemblyAI API for transcribing files and GoogleCloudService API for storing files and deploying the application. The front-end is written on Javascript using React library. We are also using Docker and CICD for cleaner synchronous working environment.

### Warehouse Associate

Sofia, Bulgaria

11/2021 - 08/2023

Responsible for importing, exporting, sorting, collecting and supervising collective goods at a specified sector of the warehouse

### Lifeguard Assistant
